

Histone deacetylase inhibitors enhance antibody-dependent cell-mediated phagocytosis

Julijan Kabiljo

Division of General Surgery - Department of Surgery - Bergmann Group

Comprehensive Cancer Center Vienna

Valproic acid & Vorinostat enhance ADCP activity

Valproic acid & Vorinostat decrease Mcl-1 expression in tumor cells

Valproic acid & Vorinostat induce pro-phagocytotic factors

HDACi enhance ADCP through multiple pathways

Trastuzumab

Trastuzumab + HDACi
